

Venus Technical data sheet of G-507-CHC-AF

Description

Venus G-507-CHC-AF safety goggles have been designed to provide complete protection to the user. This safety goggle provides superior Viewing angles than most others as it has a 5 base spherical curve which gives good peripheral vision. The soft nose bridge on G-507-CHC-AF is good for nasal comfort as well as lightweight. Because of the superior curvature of the lens this goggle also has over the glass compatibility. Indirect ventilation gives this goggle the ability to protect against chemical splashes and give superior protection against dust particles.

Intended Use

These products are intended for protection against high speed particles at low energy (F) at extreme temperature conditions, -5°C and +55°C, (T) in accordance with EN166:2001. They also protect against UV radiation.

Key Features

- 5 Base Curve spherical lens design for wide field of vision
- Anti-Fog lens with Hard coating makes it extremely resistant to scratches and chemicals.
- Double injection Frame with soft nose bridge

Applications

These products can be used for a wide range of applications including

- Furnace operation
- Chemical Industry
- Laboratory
- Mining
- Paints
- Pharmaceuticals

Standards and Approvals

The products are tested and approved against ANSI Z87.1:2003

Material Listing

Component	Material
Lens	Polycarbonate
Headstrap	Nylon
Nose Bridge	TPE
Coating	Anti-fog & Hard coated

User Instructions

- Do not make any modifications to this product.
- Do not use this product for any athletic games or recreational activities other than target shooting and archery.
- Do not use this product for paintball or simulated war activities.
- Do not use this product for protection against laser light.
- Do not use this eyewear until a snug and secure fit has been obtained. Assure that this eyewear fits securely at all times.
- Do not use this eyewear in an industrial application without referring to ANSI Z87.1-2003 & IS 5983 and your supervisor, or a safety specialist to ensure that you are wearing proper protection. Some operations may require machine guards, goggles, face shields, special filter lenses of other safety equipment.
- Do not use ammonia, alkaline cleaners, abrasive cleaning compounds or solvents when cleaning

eyewear lenses. Use of certain solvents may lower the impact resistance of the eyewear. Examine this eyewear frequently and replace it immediately if there is any sign of damage.

- Exposure to or contact with chemical vapors or liquids may cause surface cracks or other damages. Protective devices do not provide unlimited protection.
- Tinted lenses offer limited protection against sun glare or other light sources and should not be worn during welding, brazing or cutting operations.
